## SUMMARY:

Full stack software developer with expertise in front-end and back-end development, experienced in leading cross-functional teams.

## TECHNICAL SKILLS:

- **Frontend** - Javascript, React js, Nextjs, Typescript
- **Backend** - Node.js, Express.js, Typescript
- **Database** - MongoDB

## EXPERIENCE:

### Software Engineer (SE)

- Developed responsive user interfaces using React, enhancing the overall user experience.
- Implemented RESTful APIs using Node.js, facilitating seamless communication between the front end and back end.
- Resolved critical bugs and optimized codebase for improved performance, resulting in faster load times.
- Collaborated with the team to deliver features on time, ensuring alignment with project goals and milestones.

## PROJECTS:

### [private] Sitenote - Frontend and backend development

**Tech stack:** React.js, Node.js, Express.js, MongoDB, Firebase

- Implemented real-time task assignment notifications.
- Developed a feature for creating and managing project material requests.
- Integrated productivity tools such as progress tracking and scheduling functionalities.
- Designed an intuitive and user-friendly interface using React.js.
- Utilized Node.js with Express.js and MongoDB for a scalable backend infrastructure.

### [\[Link\]](#) BookMyBox backend - Backend development

**Tech stack:** Node.js, Express.js, MongoDB, Typescript

- Implemented comprehensive user authentication system including registration, login, and logout functionalities.
- Integrated features such as "Forgot Password" functionality with OTP validation for secure password recovery.
- Utilized token-based authentication for enhanced security and seamless user experience across sessions.
- Developed user profile management capabilities allowing users to update their information and preferences.
- Implemented role-based access control (RBAC) to restrict access to certain features based on user roles or permissions.
